

Oil Spill Cleanup Processes Task Card

1. Work with your partner to complete the task.

2. Look at and analyze photographs of various oil spill cleanup processes.

3. Brainstorm and discuss with your partner which cleanup strategy would work best for an oil spill occurring in an **open ocean**.

4. Repeat the above process for an oil spill occurring on a **sandy beach**.

5. Repeat the above process for an oil spill occurring along a **rocky coastline**.

6. Record ideas in your Science Learning Log/Journal.

7. Remember to consider factors such as ocean currents, surface area, weather, and wildlife habitat.
